Hiring Manager

Vertiv

Pune, India

Dear Hiring Manager,

I am writing to express my interest in the DevOps position at Vertiv. With a robust background in backend development, cloud computing, and continuous integration/deployment (CI/CD) pipelines, I am confident in my ability to contribute effectively to your team.

During my recent tenure as a Backend Developer Intern at CWIPEDIA and BitSmith Technologies, I was actively involved in developing and maintaining scalable backend systems. My experience includes designing and implementing APIs using Node.js and Express.js, optimising backend systems for better performance, and integrating CI/CD pipelines. These responsibilities have equipped me with a deep understanding of automation, system scalability, and cloud infrastructure management.

As a freelancer, I took on the challenge of designing and developing a website and CMS for Unik Photography. This project required not only backend development but also managing AWS services and ensuring robust security through advanced access control mechanisms. These tasks honed my skills in cloud-based deployments, infrastructure management, and compliance with data protection regulations.

My technical proficiency extends across a range of tools and technologies vital for DevOps, including AWS, Git, Docker, and CI/CD tools. I am also well-versed in programming languages such as Python, JavaScript, and C++, which enables me to contribute to both development and operational aspects of projects.

I am particularly drawn to the collaborative and innovative culture at Vertiv, where I can leverage my skills to streamline deployment processes, improve system reliability, and contribute to continuous delivery practices. I am eager to bring my problem-solving abilities, technical expertise, and dedication to your DevOps team.

I would welcome the opportunity to discuss how my experience and skills align with the needs of your team. Thank you for considering my application. I look forward to the possibility of contributing to [Company Name] and am available at your convenience for an interview.

Sincerely,

Shubham Avantkar
